Hi Anderas,

Please note that you can please the installation file on any storage you like.

You can also try this link: <https://u.pcloud.link/publink/show?code=XZte0GkZOJIX1AuyWJVldGH41Fgds8hssFdV> if you like

Hi Mickey,

Thanks for your reply,

Chocolately is basically a collection of scripts to automate installing and upgrading software (<https://chocolatey.org/packages>) which saves us much time and effort in our company. Normally these packages do not include a copy of the software but only links to the original download location. I was hoping to create a package for AxTraxNG, but I'm having trouble since your server does not have very fast upload and no ssl. So I was going to ask for permission to redistribute AxTraxNG from a faster server (either chocolatey.org or github.com), obviously without altering the software in any way. Would this be ok please?

Best regards,
Andreas Andersson

Hi Andreas,

Can you please let me know exactly what are you trying to do?
I'm not familiar with chocolatey.org
